

SCOFIELD® Revive™ Exterior Stain

SCOFIELD® Revive™ Exterior Concrete Stain SCOFIELD® Revive™ Colored Sealer

What is SCOFIELD® Revive™ Exterior Concrete Stain:

SCOFIELD® Revive™ Exterior Concrete Stain is the penetrating, exterior quality, polysiloxane-based stain designed to add new color or improve or renew the color uniformity of previously colored, porous, exterior broom-finished concrete surfaces. This single-component, VOC-compliant product is the ideal solution to minimize color differences between newly placed and aged concrete, or to conceal concrete patches and repairs.

Since SCOFIELD® Revive™ penetrates and reacts with the concrete and no film is formed, SCOFIELD® Revive™ colors become part of the surface, producing a luster that will approximate the sheen of newly placed concrete. SCOFIELD® Revive™ is formulated for easy installation on horizontal concrete surfaces using hand-pump sprayers or rollers.

Where to Use Revive Exterior Concrete Stain:

- Exterior concrete hardscapes
- Unsealed, colored concrete
- Unsealed, uncolored concrete
- Mismatched concrete
- Faded concrete
- Concrete with color issues

Compatible Sealers:

CEMENTONE® Clear Concrete Sealer
SCOFIELD® SelectSeal Plus™

What is SCOFIELD® Revive™ Colored Sealer:

SCOFIELD® Revive™ Colored Sealer is for use on existing interior or exterior concrete flatwork or Scofield Texturedop where uniform color and stain resistance is required. It produces a gloss finish that is resistant to blushing and will not yellow with age or exposure to ultraviolet light. SCOFIELD® Revive™ Colored Sealer helps protect against staining from incidental contact with materials such as automotive oil, grease, and food spills. It produces a low-maintenance film that improves resistance to abrasion, freeze-thaw cycles, deicing salts, weather, and many chemicals. It is helpful in preventing concrete dusting. Surfaces sealed and protected with SCOFIELD® Revive™ Colored Sealer are easier to clean and maintain than unsealed concrete. It is used as a sealer on building walls, minimizing stains from airborne pollutants. SCOFIELD® Revive™ Colored Sealer is available in a lower VOC formulation, SCOFIELD® Revive™ VOC Colored Sealer.
