

Description of Project

To install an interlocking concrete paver patio in backyard behind existing deck per drawing. Patio will be installed to the bottom of last step at side and lower steps. Two dry stacked sitting walls will be installed along perimeter (1) approx 8' long & (1) approx 12' long. Wall will be capped. One step down will be incorporated in the patio to transition the grade between the two areas of entry to the patio from existing deck. The step will include matching cap as setting wall. A border will be constructed of rectangle Parisien pavers with long edge facing inward. Main area of patio will be constructed of Blu 60mm Smooth in a (02) modular pattern. Setting wall will be constructed of MiniCreta Architectural double sided 6" block with Portifino Cap.
