

Kim,

The price to grind your concrete floor, and apply our stained concrete system with epoxy and urethane would be \$12,750.

The price to caulk any cut lines in the floor would be \$3 per linear foot. We can use a dark brown or dark gray/black caulk to compliment the color of the stain. We would need to caulk the lines before we start. If you decide to caulk the concrete after the floor has been ground then we would have to re-bid it.

Please let me know if you have any questions at all.

Thanks!
