

Kim,

The price to grind your concrete floor, and apply our stained concrete system with epoxy and urethane would be \$2,450.

This price includes using the same color mixture as last time. I should note that even if we use the exact same color mixture, it is possible that the color will vary from the last time we did the project. Different methods, batches and environmental conditions can effect the appearance of the final product.

Please let me know if you have any questions at all.

Thanks!
